

T-Harness Installation

Models

#BDT-2090

#BDT-2091

- Step 1: Remove the dash panel that covers the radio in the center of the dash.
- Step 2: Next, remove the radio **NOTE: If you have a radio with an anti-theft lock, you must have your radio code if you unplug the power harness on the radio.)**
- Step 3: Now unplug the factory ignition harness at the bottom of the key switch.
- Step 4: Plug the T-harness in between the factory ignition harness.
- Step 5: Route the T-Harness so that it does not interfere with any moving functions of the vehicle.
- Step 6: Test all functions of the vehicle to make sure that all operations work according to OEM requirements.
- Step 7: Plug in the Remote Starter/Alarm module to the T-Harness.
- Step 8: Test all functions of the Remote Starter/Alarm module and then secure the module into place with nylon tie straps.
- Step 9: Replace all panels in reverse order of removal.
